MIX 'N' MATCH

By Reggie Ramloose

Well, I won't announce the winner of the "Worst Name for a Computer Game" contest, mainly because there have been no submissions. If I don't get an entry soon, I'll award the no-prize to myself for my own entry, "THE ATTACK OF THE BAD KARMA CHAMELEONS".

This month, it's mix and match. See if you can match the programs in the left column with the right column, which is something you will see on the screen if you wrestle with the program long enough. Only the real hackers will get all of these.
